

FSE63400P Dishwasher

Customised Cycles, Complete Cleaning

Advanced sensors in AEG dishwashers automatically adjust the time, temperature and water usage according to the soil level of each load. So you can have customised cycles for each clean with the very best results every time.

Dedicated protection for your delicate glasses

Glasses are often the most delicate items in your dishwasher, which means they need special care. The upper basket in this dishwasher has soft rubber spikes to support and protect glasses. The SoftSpikes stabilise your glasses and mugs efficiently, preventing them from falling over and possibly breaking.

Ready when you are

Make the most of the time you have available with the delay start function in our dishwashers. Preset a programme time that suits and enjoy the convenience of having clean dishes when you want them.
