IKB32300CB

Customise your kitchen to your exact needs

The modular system of this hob provides you with maximum flexibility when designing your kitchen. You can make sure the final layout meets your own individual needs.

Product Benefits & Features

Because the surface around the pans stays cool as you cook, you can get rid of spills as you go along. Nothing gets burnt on, and there's nowhere for dirt to hide. So it's easy to keep the hob area looking pristine – even while you're still cooking.

- · Independent hob with controls
- · Hob type: Induction
- Induction zones with power booster function
- Pause function for short interruptions
- Pot detection
- Timer function
- OptiHeat Control
- · Acoustic signal with switch off option
- Child safety lock function
- Key-lock function
- · Hob safety:
- SlimFit
- Ceramic glass colour: Black

Mastering the menu. At your fingertips

The individual touch controls in the AEG induction hob are equipped with plus or minus buttons for effective temperature control. Adjust the settings at a touch for absolute control over the cooking process. Precision for every step of a recipe, always resulting in great taste.

Quicker heat for extra speed

No more waiting around for pots to boil. The PowerBoost button gives you an instant burst of heat that boils water in under 90 seconds* – that's even faster than an electric kettle. It's perfect for tasks like boiling potatoes, and other quick cooking jobs too, like searing meat.

Total control over cooking time

The adjustable timer (max. 99 minutes) will remind you of the cooking time. It can also be used as a minute minder when the burners are not in use.

Precise settings.

Protected

Activate the key feature to lock cooking settings. From the time to the temperature, everything can be set and secured at the touch of a button. So there's no possibility of changing anything accidentally while wiping spillages from the surface. Simply press the key feature again afterwards to adjust the settings when it suits.
